## Profile Summary

A seasoned professional with a unique skill set in program management, software development, and research. My extensive experience in program management has enabled me to effectively lead diverse teams and align projects with organizational goals. I excel in software development, consistently enhancing user satisfaction through the development and modification of software solutions. Additionally, my background in social research empowers me to make data-driven decisions, thereby enhancing project outcomes. I have a strong track record in stakeholder management, ensuring their needs are met through clear communication and proficient administration. My multifaceted skill set, combining project management, software development, research, stakeholder management, and data utilization, positions me as a valuable asset in dynamic work environments.

## Core Competencies

Research and Data Analysis; Software Development; Project Management; Stakeholder Management; Risk Analysis; User Satisfaction Improvement; Team Leadership; Strategic planning

## Technical Skills

- Proficient in Microsoft Office Suite.
- Competent in React.js, Next.js, Firebase, and Laravel for software development, and Illustrator, XD, and Figma for UI & UX experience design.
- Knowledgeable in Python for data science, with proficiency in NumPy, Pandas, Matplotlib, Tableau, Microsoft Excel, and MySQL Workbench for data science, business intelligence, and database management.

## Education

- MSc in Political Science (International Relations and Diplomacy), University of Nigeria, Nsukka, 2021
- Diploma in Political Science, University of Nigeria, Nsukka, 2019
- Bachelor of Arts, English & Literary Studies, University of Nigeria, Nsukka, 2015

## Special Qualifications

- Software Engineering, ALX Africa, 2022/23
- Next.js & React.js, Udemy, 2021
- React.js & Firebase, Udemy, 2020

## Experience

### Project Manager & Software Developer | Des N Dev Ltd | February 2023 - Present

- Engineered a responsive React.js front-end with optimized user experience and implemented robust Laravel backend logic for a cutting-edge financial services project.
- Interpret project designs and devised effective strategies for realizing client expectations.

- Collaborated extensively with team members to implement strategies and designs for clients and the company.

### Academic / Social Research and Reportage

Collaborated in the research and publication of several academic research papers on various topics, including forced migration and displacement, social health, aging, and public health. My involvement included:

- Identifying knowledge gaps through comprehensive literature reviews and scheduling meetings and interviews with key research participants.
- Developing and refining methodologies for data collection and analysis, including rigorous testing of these methodologies before adoption.
- Conducting data computation and analysis using statistics and data analysis tools such as IBM SPSS and NVivo.
